Join us and over 300 other women who are activists, mothers, caretakers, consumers and leaders in our community for this national conference to discuss the impact of health care reform on our lives. The Avery Institute, along with the National Women's Health Network and Merger Watch, will co-convene this timely conference where we will discuss, strategize, and plan ways to create health care policies that are grounded in our best interest.

This election year, health care reform is on the national agenda, and we have the opportunity to create a health care system that works for us. As women, the health care system we need must include comprehensive reproductive health services; meet our diverse needs; bridge the gaps in services; and provide quality health care that is affordable and accessible for women and our families across the life-span. If we want the health care debate to reflect our issues, we need to become part of the conversation!

Raise Your Voice for the Health Care We Need!
